

## **Position Overview:**

**Organization:** Burgundy Asset Management Ltd

**Title:** Permanent Position, Developer, Business Solutions

**Reports to:** Head of Business Solutions

**Location:** In person/on-site at 181 Bay Street, Suite 4510, Toronto, ON, M5J 2T3

## **Come work at Burgundy!**

Burgundy Asset Management is a leading global investment manager providing discretionary investment management for private clients, foundations, endowments, pensions, and family offices. Founded in 1990, Burgundy strives to protect and build our clients' wealth over the long term. Burgundy is fully independent, and employee owned.

At Burgundy, our values of honesty, courage, and always doing what is in the best interest of the client are brought to life by the daily actions of our people. No matter the position, the right candidate shares our values and understands that everything we do, great or small, is in service of our clients.

## **The Position**

Reporting to the Head of Business Solutions, you will be an on-site member of Burgundy's Business Solutions team. In this role you will support our design, development and DevOps activities. You'll collaborate with a diverse team to plan and implement flexible and innovative solutions that deliver a best-in-class client experience.

## **What is in it for you?**

At Burgundy our culture is one of radical responsibility. We thrive in an environment where we are continuously learning and improving in service to our clients and one another. The environment will be fast paced and will be filled with learning experiences.

- Work in person, for a dynamic, face paced, progressive and high performing team
- Leaders who will support your development through coaching and mentoring
- Access to future career opportunities
- Opportunities to do challenging work
- Ability to make a difference and have a lasting impact

## **Responsibilities**

In this role, you will:

- Develop new applications using the Microsoft Azure, C#, and industry-specific technologies
- Maintain and support changes to existing applications and processes
- In collaboration with Project Managers and Business Analysts, review business requirements and put together technical requirements, designs, and estimates
- Implement automation tools and enterprise level APIs to advance application features
- Work closely with UI developers to ensure seamless integration between frontend and APIs
- Troubleshoot and assist in testing efforts during project testing phases
- Provide escalated support of production processes. Support during off hours may be required
- Maintenance and creation of data integration processes with internal and third-party data sources

## **Skills and Specifications**

The ideal candidate will be/have:

- Architecture design experience with both on-premises and cloud solutions, in particular, Microsoft Azure
- Experience with the management of DevOps pipelines and source repositories

- Proven ability to work effectively with teams
- Detail and results-oriented, with the ability to work on multiple projects simultaneously
- Able to thrive independently in a fast-paced environment
- Proficient in change management tools such as Git, Azure DevOps, JIRA, and Confluence
- Experience integrating and customizing third-party system components and services

### **Required Qualifications**

- Undergraduate Degree or College Diploma in a technical field such as Computer Science or Engineering or equivalent experience
- 4+ years of database and data integration development with SQL, Microsoft SSIS, Azure Data Factory, or equivalent platforms
- 3+ years in building, supporting, and consuming cloud hosted REST APIs, ideally with C# and Azure Functions
- Microsoft Dynamics and Power Platform development experience is an asset
- Salesforce/APEX/Aura development experience is an asset
- Experience with PowerShell scripting is an asset
- Experience with client portal web development, OAuth, and mobile delivery is an asset
- Experience working in the financial industry is an asset

If this sounds of great interest to you, please send your resume and cover letter to [careers@burgundyasset.com](mailto:careers@burgundyasset.com), referencing the job title (Developer, Business Solutions) in the subject line. The deadline for submissions is March 28, 2025 @ 5pm EST.

We thank all applicants for their interest, please be advised that only those selected for an interview will be contacted.

*Burgundy Asset Management Ltd. is an equal opportunity employer. Accommodations on the basis of disability, and other accommodations as required by the Ontario Human Rights Code, are available on request at all stages of the selection process and during employment.*
